A-Z digital implant dentistry

9-13 July | 1-5 October, Rome

This interactive course is structured to provide step-by-step training at a very personal level. It employs case-based learning by emphasizing evidence-based learning for daily usage. Participants will learn from the basic tools to the latest advancements in digital implant dentistry. Streamlined clinical and digital workflows will be presented to increase efficiency and clinical outcomes. All the secrets of static guided surgery and X-Guide dynamic navigation will be unveiled to discern when and how to use the different surgical options, including the review of the current CBCT, IOS and Face scanning technologies.

Speaker: Prof Alessandro Pozzi

Speakers

Dr. Tariq Ali

Dr. Ali qualified from the University of Glasgow with a degree in Dental Surgery in 1998. Dr Ali then went on to train in aesthetic and implant dentistry, studying under world renowned experts and completing his training at the Royal College of Surgeons in London. He is one of a few select dentists who have passed the highly regarded Faculty of General Dental Practice Diploma in Implant Dentistry and he is now a member of the Faculty of General Dental Practice and the Association of Dental Implantology.

Dr. Hatem Algraffe

Hatem Algraffe qualified as a dentist from the Royal London Hospital in 1996. In 2004 he completed four-year specialist training at Guys Hospital/Kings College achieving two Master degrees. Since 2004 Hatem has been in private specialist practice and been involved in undergraduate and postgraduate teaching. Hatem works in private practice approximately four days a week with remaining time dedicated to PerioAcademy teaching and mentoring colleagues.

Dr. Javier Bobes Bascaran

Dr. Javier Bobes Bascaran is a dentist with more than 15 years experience. He holds a Masters degree in Prosthesis and Occlusion and a Ph.D. in implant biomechanics. He has postgraduate qualifications and training in various disciplines such as: implantology, periodontology, orthodontics, cosmetic dentistry, restorative, facial aesthetics, sleep medicine and temporomandibular joint disorders. He takes a multidisciplinary approach to dentistry. Dr. Bobes Bascaran is published in multiple scientific journals and has been a speaker at meetings of the International Team for Implantology (ITI Iberica), the Spanish Society of Prosthesis and Esthetics (SEPES), Spanish Society of Temporomandibular disorders and orofacial Pain (SEDCYDO) and of the Illustrious Dental College of Asturias (CODES).

Dr. Katie Blake

Katie graduated from St Bartholomew's and The Royal London School of Medicine and Dentistry in 2010. She then worked as a General Dentist in London and a Senior House Officer in Oral Maxillofacial Facial Surgery in King's College London. In 2012, Katie completed her membership of the Faculty of Dental Surgery from Royal College of Surgeons Edinburgh. Following this, she undertook a postgraduate qualification achieving her Diploma in Dental Implantology at the Eastman Dental Hospital, UCL London. Through her extensive experience at a specialist clinic in London, she is able to provide a full range of dental and implant solutions, from a single implant to full arch implant restorations and Teeth In A Day (also known as All-on-4) protocols, using Nobel Biocare implants. She can also utilise bone grafting techniques and has completed further training at The Malo Clinic, Lisbon and Urban Regen Institute, Budapest.

Speakers

Dr. Robert Bolt

Dr. Robert Bolt is a Clinical Lecturer and registered Specialist in Oral Surgery. He is both medically and dentally qualified and is Director of the University of Sheffield's "One-to-One" dental implantology course. Dr. Bolt completed a PhD relating to the role of the microenvironment in the management of HPV-related oropharyngeal carcinoma in 2015, and continues to work in both clinical and in-vitro fields of research. Dr. Bolt's interests include dental implantology, HPV-related oropharyngeal carcinoma, 3D tissue culture modelling, pre- & peri-operative anxiety management, and bone augmentation.

Dr. Richard Brookshaw

Richard first qualified in 1996 from the University of Dundee. Then in 1999, he gained his Master's degree in Oral Surgery from the University of Sheffield and further extended his clinical qualification in 2001 by completing an 18-month implant training programme. In 2009, he attained the highest honours award in the 1-year implant master program from the University of California Los Angeles/ gIDE program. In 2009, he was one of the first five implant dentists in the country to be awarded the Diploma in Implant Dentistry from the Royal College of Surgeons of Edinburgh (Dip Imp Dent RCS Ed). Richard is both nationally and internationally respected as a lecturer and mentor in all aspects of Implant Dentistry. He lectures for Nobel Biocare nationally and internationally on a range of advanced implant techniques and is a regular lecturer and contributor at the Nobel Biocare international conferences. He is one of only a handful of implant surgeons nationwide who is able to carry out implant surgery in patients with extreme bone loss, using specially designed zygomatic implants. Richard exclusively practices all aspects of implant dentistry, including hard and soft tissue augmentation, sinus grafting and same-day implants.

Dr. Andrew Dawood

Andrew qualified from The Royal London Hospital in 1984 and followed this with hospital appointments at Guy's Hospital, University College Hospital, The Eastman Hospital and The Hospital for Sick Children, Great Ormond Street. He went on to study for a Master's degree in Conservative Dentistry at Guy's Hospital and in 2000 was accepted on to the Specialist Register in both Prosthodontics and Periodontics. He has been placing dental implants for more than 25 years, and this has become his particular area of interest and expertise. He teaches and lectures extensively in the UK and abroad, and devotes time to Research and Development in Implant Dentistry, 3D Imaging, and 3D Manufacturing with several of his innovations patented, at times using his own designs of implants which are specially manufactured by Nobel Biocare for particularly challenging cases.

Andrew Forsyth

Andrew is the owner of Atelier Dental Laboratory. For the last 14 years Andrew has dedicated his workflow to immediate load cases as well as final restorations. Andrew works nationwide for many of the leading specialists concentrating on All-on-4/ teeth in a day type of work as well as newcomers of full arch work. To date Andrew has done in excess of 3000 immediate load cases as well as many thousands of final restorations, making him one of the country's most experienced technicians in this type of work. His experience over the years has made him accomplished at many different scenarios and pitfalls during the process of surgery and conversion of the laboratory side, enabling him to provide useful solutions to every eventuality. Andrew was a finalist in the national Laboratory Awards in 2017 for full arch restorations.

Speakers

Dr. Wail Girgis

Wail is a Clinical Director at Devonshire House and a Specialist Prosthodontist. He provides general dental care for a broad patient base and, as a Specialist Prosthodontist, is especially skilled in the replacement of missing teeth, the restoration of natural teeth and in complicated and simple restorations of the whole mouth. Wail trained at King's College Hospital Dental School, London and went on to complete an MSc degree in Conservative Dentistry at the Eastman Dental Hospital, London where he taught thereafter as a clinical lecturer. Wail went on to teach at the International Centre for Excellence in Dentistry on the Implant Certificate Course. He is a member of the International Team for Implantology for whom he is a clinical lecturer. Wail joined Devonshire House in 1998 and is now a Clinical Director.

Dr. David Guy

David qualified as a dentist from Cardiff Dental School, where he was awarded the Wystan Peach prize for Restorative Dentistry. He completed, with Distinction, his Masters Degree in Implant Dentistry at Warwick Medical School. He then completed, again with Distinction, his post-graduate Certificate in Restorative Dentistry at the Eastman Institute, University College London. He was the first person to have been awarded a Fellowship of the British Society of Oral Implantology. David was an Associate Fellow of the Clinical Institute of Education at Warwick Medical School where he taught on the MSc Implant Dentistry course prior to founding an independent implant teaching facility which subsequently became Guy's College. David has also been involved in research in stem cell technology for bone regeneration with Swansea University. Between 2010 and 2012 he pioneered a new protocol for alveolar ridge augmentation (socket grafting) using a three layer approach, which has become widely used and in a recent study demonstrated a highly impressive bone volume preservation of between 95% and 105%, far in excess of most other techniques reported in the literature to date.

Dr. Robin Horton

Dr Robin Horton is the owner of and principal dentist at Wayside Dental Practice and has been placing dental implants for over 15 years. Robin has revolutionised patient care at Wayside by investing in dental lasers (all clinicians offer diode and waterlase laser dentistry), CBCT, Intra-oral scanners, T-scan bite analysis and EMS Airflow (each hygienist has one), and of course the X-Guide. Robin has now placed over 300 implants with the X-Guide which has taken implant placement to another level of comfort, safety, precision and aesthetic outcome. Robin lectures internationally on dental lasers and implants and is also a mentor for Nobel Biocare.

Dr Fiona J. MacKillop,

Fiona qualified from Glasgow University in 1993. Following a short spell in general practice; she began her career in Periodontology, achieving a Masters Degree from Guy's Hospital in Periodontology in 1997. In 1998, Fiona accepted a post as Assistant Clinical Professor of Surgical Sciences (Periodontics) at New York University. She was then accepted on to the specialist register in Periodontology in 2005. Fiona continued working for a period, at Guys' Hospital as an Honorary Clinical Demonstrator in the Department of Periodontology. For the past 20 years her work has been focused in private practice. Her interests include bone regeneration and soft-tissue considerations in dental and implant sites. Having been very much involved with the British Women's Society of Implant Dentistry since 2016, Fiona is a strong advocate for women in dentistry. She was accepted onto the board of the Association of Dental Implantology in 2024, and is keen to continue promoting and encouraging more women into the field of implant dentistry.

Speakers

Dr. Scott MacLean

Dr. Scott MacLean graduated from the Dalhousie Dental School in 1991. Dr. MacLean is the owner of Trimac Dental Centre in Halifax, where he maintains a strong focus on implant and aesthetic dentistry. An active member of the dental community, Dr. MacLean is a fellow of the International Congress of Oral Implantology, the Canadian Academy of Restorative Prosthodontics, the Academy of Dentistry International, the Pierre Fauchard Academy, the American College of Dentists, the International College of Dentists, and the Greater New York Academy of Prosthodontics. He is a member of the Canadian Dental Association, the Academies of Esthetic Dentistry and General Dentistry, the American Academy of Cosmetic Dentistry, and the Atlantic Implant Study and International Association Orthodontics Study Clubs.

Dr. Harpreet Mandair

Harpreet Mandair qualified in 2012 from the University of Birmingham. He achieved the University of Birmingham Conservative Dentistry 2012 award for the best restorative dentist. Harpreet gained the coveted Diploma in Implant Dentistry from the Royal College of Surgeons, Edinburgh in his first sitting. The diploma is a prestigious award that demonstrates excellent knowledge and skill and is only awarded to implant dentists of a certain level from across the world. Harpreet has dedicated his post graduate education to implant dentistry. He has undertaken numerous training courses worldwide in advanced guided bone regeneration and soft tissue management with Dr Istvan Urban and Dr Sasha Jovanovic at the world renowned Urban institute and Gide institute in Los Angeles respectively. In 2019 he further enhanced his management of soft tissue under Ricardo Kern's advanced soft grafting course

Dr. Amit Mistry

Amit is a nationally-renowned dental implant surgeon, working in the northwest of England. His full time clinical practice is dedicated exclusively to dental implant related surgery. Amit lectures extensively on his areas of expertise in this field and is a sought after mentor by other dentists who wish to learn from his vast knowledge and experience. His experience and training set him apart as the surgeon of choice for referring everything from single tooth implants to the more advanced full mouth implant cases that require zygomatic implants. For referring dentists who are confident in completing restorations, Amit is happy to provide surgical-only support. As an accomplished surgical dentist, he is skilled in the surgical procedures required to assist in the placing of implants, such as sinus lifts and bone grafts. Amit can also provide support by placing implants for complexed full mouth implant cases including the placement of zygomatic implants.

Dr. Sam Parsno

Sam is the founder and course director for London College of Oral Implantology (LCOI). He graduated from one of Europe's most prominent dental Universities known as the home of the Nobel Prize Assembly, the prestigious Karolinska Institute in Stockholm. The Karolinska Institute was ranked as number one university for Dentistry by QS World Universities ranking in 2019. Sam has been registered with the UK General Dental Council (GDC) since 1996 (GDC Number: 72207) and has successfully placed over 1000 implants since 2000. He has 19 years experience and has completed many years of postgraduate training with special interest in advanced cosmetic and implant dentistry in Sweden (Brånemark Clinic in Gothenburg), Austria, Germany, United Kingdom (Oxford University studying Systematic Reviews and The Royal College of Surgeons) and Spain. In addition to working in his private practice (Allure Dental Care), he visits other practices in London and other cities in the UK for implant treatment and implant mentoring.

Speakers

Dr. Dev Patel

Graduated from King's College in 1991 and completed his postgraduate training at the Eastman Dental Institute with distinction in 2000. Dual specialist in Prosthodontics & Oral Surgery, one of only a few in the UK. Director of Implant programmes at Eastman Dental Institute, University College London. Examiner, Faculty of Dental Surgeons, Royal College of Surgeons, England. Lecturer at local, national and international levels.

Dr. Neeraj Puri

Neeraj qualified in Glasgow in 1996. He moved to Edinburgh the same year; working with many notable dentists to develop his skills. He has continued to progress his knowledge in advanced reconstructive, cosmetic and surgical dentistry by studying extensively in Europe and America to ensure that he is looking at the latest developments before they become available in this country. Neeraj has been awarded a Certificate in Implantology from the prestigious Eastman Dental Institute.

Dr. Susan Tanner

Susan qualified from University College Hospital and then took up positions at the Westminster Hospital in maxillofacial surgery, Guy's Dental Hospital in conservative dentistry, children's dentistry and orthodontics, and St Bartholomew's Hospital providing prosthodontic treatments for patients within the maxillofacial department. This was followed by a Master's Degree and acceptance onto the Specialist Register.

Her Masters Degree in Prosthetic Dentistry from The Eastman Dental Hospital has formed a cohesive platform for the vast number of full arch and short span implant reconstructions she has carried out for referring colleagues and for patients of her practice over the years. Utilising the latest technology to plan and construct restorations, she works in close conjunction with implant surgeons and laboratory technicians.

Dr. Boota Ubhi

Graduated in 1992 and later gained an MSc in periodontology from Liverpool University. He became a lecturer at the university and passed his membership in restorative dentistry from the Royal College of Surgeons of England in 2000 to become a registered specialist in periodontology. Since then, Boota has lectured at universities and educational events in the field of periodontics, dental implantology and bone/soft tissue augmentation, running his own implant training programme for colleagues as well. He is principal of Birmingham Periodontal & Implant Centre (BPI Dental) and an active member of the British Society of Periodontology, the Association of Dental Implantology and the American Academy of Periodontology.
