

# Global courses 2026

Clinical  
Education

Nobel  
Biocare™

Professional development is a journey, not a destination. Nobel Biocare is committed to helping you advance on your path to fulfilling your professional ambitions. For clinicians and dental professionals at any stage of their implantology journey, we offer progressive courses in dental education – both in-person and online – as well as industry events and on-demand resources.

Every year, over 140,000 professionals attend dental implants courses and other training through Nobel Biocare.

We invite you to explore educational opportunities from our global LEADers.

# Course levels

## Fundamental course

Surgical and prosthetic procedures in straightforward cases to achieve predictable esthetic and functional outcomes. Includes: implant dentistry certification programs, diagnostics and treatment planning, conventional/two-stage implant surgery.

## Advanced course

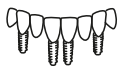

More advanced surgical and prosthetic procedures, building on fundamental skills. Includes: hard and soft tissue management, Immediate Function, graftless solutions and full-arch rehabilitation.

## Expert course

Challenging situations using advanced treatment planning and complex surgical and prosthetic procedures. Requires significant experience in placing implants. Includes full-arch rehabilitation with high maxillary resorption and complex grafting.

# Course themes

## Full-arch treatments

These courses focus on treating failing dentition and edentulous patients with proven, minimally invasive solutions that deliver immediate function and long-term esthetics. Designed for clinicians managing complex cases, key topics include:

- Zygomatic implants: A graftless solution for patients with severe maxillary resorption, enabling fixed prosthetics even in challenging anatomies
- All-on-4<sup>®</sup> treatment concept: A cost-effective, immediate-loading protocol using four strategically placed implants to support a full-arch restoration
- All-on-4<sup>®</sup> digital workflow: A fully integrated digital approach - from diagnostics to final prosthesis - enhancing precision, efficiency, and patient satisfaction

## Single and multiple implants treatment

These courses focus on restoring one or several missing teeth with implant-supported solutions that prioritize long-term function and esthetics. Topics include:

- Treatment planning for various indications and bone conditions
- Surgical protocols for predictable implant placement
- Prosthetic workflows for single crowns, short spans, and multiple units

## Regenerative treatments

Courses in this category cover techniques to rebuild bone and soft tissue for optimal implant placement and long-term stability. Topics include:

- Hard and soft tissue regeneration strategies
- Techniques for guided bone and tissue regeneration
- Clinical protocols to manage compromised sites and enhance esthetic outcomes

# Your journey to mastering the All-on-4<sup>®</sup> treatment concept

**80+** courses  
**90+** locations  
**100+** experts

## Why the All-on-4<sup>®</sup> treatment concept?

- **Transform lives:** The All-on-4<sup>®</sup> treatment concept offers immediate function and esthetics for edentulous patients, often in a single surgical session<sup>1,2</sup>.
- **Clinical efficiency:** Fewer implants, no grafting, and faster recovery make it a cost-effective and time-saving solution<sup>1,2</sup>.
- **Practice efficiency:** Streamlined planning and prosthetic design reduce chair time and enhance predictability<sup>3</sup>.

<sup>1</sup>Weinstein R, Agliardi E, Fabbro MD, et al. Immediate rehabilitation of the extremely atrophic mandible with fixed full-prosthesis supported by four implants. Clin Implant Dent Relat Res 2012;14(3):434-441. [Read on PubMed](#).

<sup>2</sup>Agliardi E, Clericò M, Ciancio P, Massironi D. Immediate loading of full-arch fixed prostheses supported by axial and tilted implants for the treatment of edentulous atrophic mandibles. Quintessence Int 2010;41(4):285-293. [Read on PubMed](#).

<sup>3</sup>Babbush CA. Posttreatment quantification of patient experiences with full-arch implant treatment using a modification of the OHIP-14 questionnaire. J Oral Implantol 2012;38(3):251-260. [Read on PubMed](#).

# Your pathway to excellence

- **Foundational knowledge:** Online modules covering anatomy, treatment planning, and restorative options.
- **Hands-on training:** Live surgeries on real patients.
- **Advanced techniques:** Managing complex cases and complications.
- **Mentorship and community:** Join a global network of clinicians transforming full-arch rehabilitation.

## What we offer

- Comprehensive curriculum
- Live patient treatment and hands-on sessions
- Online learning
- Expert instructors
- Certification and CE credits

# Ready to start your journey?

## All-on-4<sup>®</sup> treatment concept cirugía guiada

 **By request**

 **Santa Cruz de Tenerife , Spain**

Level

More details

El concepto de tratamiento All-on-4<sup>®</sup> treatment concept ofrece a los pacientes edéntulos y potencialmente edéntulos una prótesis de arcada completa sobre cuatro implantes el día de la cirugía consiguiendo así pacientes satisfechos con respecto a la función, la estética, los sentidos, el habla y la autoestima. Además, el concepto de tratamiento All-on-4<sup>®</sup> treatment concept se puede combinar con un protocolo quirúrgico guiado. Mediante un buen diagnóstico, unos conceptos claros sobre los implantes, una correcta planificación del tipo de prótesis y la ayuda de las nuevas tecnologías, podremos realizar un tratamiento correcto y sin complicaciones en la mayoría de los casos. El programa tiene un componente teórico (virtual) y práctico, tanto en tipodonto, modelo animal y paciente real. Curso Personalizado.

# All-on-4<sup>®</sup> treatment concept - an effective and minimally invasive solution

 March 20-21, 2026

 London, UK

This advanced-level course is designed for dental clinicians who already place implants and wish to expand their expertise in full-arch rehabilitation using the All-on-4<sup>®</sup> treatment concept. The All-on-4<sup>®</sup> treatment concept approach offers patients immediate improvements in function, comfort, esthetics, and speech through a cost-efficient, graftless solution—ideal for cases with limited bone availability. Participants will gain in-depth knowledge of treatment planning, patient selection, and anatomical considerations. The course combines theoretical instruction with practical hands-on exercises; surgical and prosthetic, impression taking, verification jig, etc.

Level

## Implant retained overdentures

 **March 20, 2026**

 **North York, Canada**

This one-day program will provide general dentists with a profound understanding of what it means to be completely edentulous as well as how patients with a terminal dentition can benefit from the transition to an implant retained overdenture. A series of case histories will highlight the diagnostic criteria, treatment planning sequence of care and the associated maintenance involved in providing this treatment modality. A hands-on training exercise will help familiarize general dentists with the implant prosthodontic components involved.

# All-on-4<sup>®</sup> treatment concept 全口重建臨床實戰：始於基礎，實於臨床

📅 April 10–12, 2026

📍 Taipei, Taiwan

Level

More details

此課程是少見理論與臨床觀摩合併的課程。由口腔顎面外科權威林涵威醫師與鑲復假牙專家林正忠醫師攜手打造的高度專業課程。課程中，會邏輯性地整理並解說 All-on-4<sup>®</sup> treatment concept 全口重建的概念與執行，且搭配數位軟體的分析與上下顎擬真模型實作，幫助學員學中做、做中學。且三天實體課程過後，將帶領學員實際走入臨床，與我們共度一日重建案例。早上會先進行臨床案例術前討論，從術前規劃、手術設計開始，接著到手術室參與手術治療。接著進行鑲復的治療計劃說明，再到診間進行下半場的鑲復流程與臨時假牙裝置。最後進行一日重建內容的復盤與討論，讓學員都可以收穫滿滿，信心十足地回到自己的臨床工作，給患者滿意的笑容。

# All-on-4<sup>®</sup> digital workflow

📅 April 11-20, 2026

📍 Hsin-Chu, Taiwan

Level

More details

- All-on-4<sup>®</sup> treatment concept 一日全口重建課程，快速縮短你的學習曲線，讓對這項技術有興趣的醫師，能夠真正的用這項技術，正確的幫助你的患者。
- 數位化的時代來臨，牙科與數位融合所帶來的轉變，我們相信這是一個可以讓牙科更好的契機，而它也讓我們知道 All-on-4<sup>®</sup> treatment concept 術式的數位化勢在必行！
- 三口品牙醫藉由多年的 All-on-4<sup>®</sup> treatment concept 全口重建經驗，累積大量的實戰案例，奠定了三口品 All-on-4<sup>®</sup> treatment concept 數位化的基礎，發展出一套全數位流程，我們相信這是未來的趨勢！
- 從過去傳統 All-on-4<sup>®</sup> treatment concept 24小時縮短到8小時完成治療，現在加入了數位流程後，更是縮短至5~6小時內完成！透過導航、數位軟體的輔助，讓整個療程更加精準安全，大幅減少併發症的問題，不僅保障病患，也讓醫師們更安心！
- 為了讓課程效益最大化！課程內容有大量實戰教學，包含 DTX Studio™、Exocad™、X-Guide®、Meshmixer 等等，豐富的軟、硬體實作教學！課程另引進數位動態導航機，並分享所有數位流程所需的表單、文件！可以一應俱全，絕不讓你空手而歸！

# Full-arch rehabilitation course (2 modules)

 May 4–6 • 11–12, 2026

 Lisbon, Portugal

## Module I: Full-arch fixed rehabilitation essentials

Gain a comprehensive understanding of full-arch implant-supported prostheses, including:

- Comparison of fixed, semi-fixed, and removable full-arch solutions
- Step-by-step planning and workflow from temporary to final prosthesis
- Impression techniques, design principles, and material selection
- Patient home care and clinical recall protocols

## Module II: Hands-on bootcamp

Two intensive days of practical training:

### Day 1

- Live demo by GSD Academy instructor
- Hands-on practice with model cases and prosthetic component selection
- Case previews and group discussion

### Day 2

- Clinical training with real patients at various stages of full-arch prosthesis fabrication and delivery

# All-on-4<sup>®</sup> treatment concept - an effective and minimally invasive solution

September 11–12, 2026

York, UK

This advanced-level course is designed for dental clinicians who already place implants and wish to expand their expertise in full-arch rehabilitation using the All-on-4<sup>®</sup> treatment concept. The All-on-4<sup>®</sup> treatment concept approach offers patients immediate improvements in function, comfort, esthetics, and speech through a cost-efficient, graftless solution—ideal for cases with limited bone availability.

Participants will gain in-depth knowledge of treatment planning, patient selection, and anatomical considerations. The course combines theoretical instruction with practical hands-on exercises; surgical and prosthetic, impression taking, verification jig, etc.

# Zygoma implant masterclass: Surgical and prosthetic digital solutions

October 10, 2026

Zagreb, Croatia

This advanced theoretical and practical course is intended for experienced clinicians who wish to expand their knowledge in the field of full edentulism rehabilitation using zygomatic implants.

The course will present a step-by-step protocol for planning, implant placement and prosthetic rehabilitation in both analog and digital approaches. A thorough review of the anatomy of the atrophic maxilla will be given, along with a detailed presentation of the surgical technique for placing zygomatic implants, as well as possible complications and their management.

Participants will watch a live broadcast of a surgical procedure with 2 or 4 zygomatic implants to observe implant placement in practice. They will also have the opportunity to place zygomatic implants themselves on a jaw model during the hands-on workshop.

# Complete edentulism: analogue and digital approach

 November 5–7, 2026

 Quebec City, Canada

Program is in French.

This intensive three-day advanced training equips participants with the critical knowledge and hands-on experience needed to optimize surgical outcomes from initial planning to final restoration. Drawing from scientific literature and clinical practice, the course emphasizes personalized decision-making based on each patient's unique needs. Through a blend of theory—including prosthetic and surgical planning, bone resorption biology, virtual protocols, and complication management—and practical exercises such as model surgery, technical impressions, and live patient procedures, attendees will refine their skills and elevate their clinical practice to a higher level.

# Prof. Paulo Maló

Prof. Paulo Malo completed his dental studies at the University of Lisbon's Faculty of Dental Medicine in 1989. In 1995, he established the Malo Clinic, and later in 2019, he founded MALO DENTAL, which is present in 22 countries and 16 cities in Portugal.

Prof. Malo is the pioneer of the Malo Protocol, which encompasses a range of innovative surgical techniques and products. These include, immediate loading on single implant and short span bridges, the All-on-4<sup>®</sup> treatment concept, a novel zygoma implant and protocol, the NobelSpeedy<sup>®</sup> and NobelParallel<sup>™</sup> Conical Connection implants, and the advanced Malo Bridge technical solution (CAD/CAM Bar with individual crowns), among other significant innovations. His contributions have set a new benchmark in fixed oral rehabilitation, earning him worldwide recognition in both the dental and medical communities.

In addition to his clinical work, Prof. Malo holds numerous patents registered in the United States. He is also a visiting professor at several universities and has published and co-authored more than 100 significant international articles and has contributed to several books. Prof. Malo is a regular speaker at international conferences, where he shares his expertise and insights. His medical and dental breakthroughs, coupled with his exceptional management, leadership, and entrepreneurial skills, have earned him several distinctions and awards. His work continues to influence and shape the field of dentistry.

# Diploma especialista universitario en cirugía, prótesis-oclusión sobre implantes, manejo de los tejidos blandos y práctica sobre pacientes

April 15–October 15, 2026

Madrid, Spain

En este curso os formaremos de la A a la Z y está dirigido tanto a los odontólogos que pretendan iniciarse, como a los que deseen perfeccionar y actualizar cualquier área de la Implantología, es una interesante oportunidad para adquirir la destreza suficiente para abordar los tratamientos de implantes dentales, de casos simples a complejos, tanto en el ámbito del diagnóstico, como del tratamiento, instrumental, técnicas y materiales. Se trata de un programa con una carga práctica del 70 % y destinado a un grupo reducido de alumnos.

El principal objetivo es afianzar los suficientes conocimientos y adquirir la habilidad y confianza necesarias para que el alumno pueda establecer un correcto diagnóstico y plan de tratamiento de todas las situaciones clínicas posibles, en las que el tratamiento con implantes dentales es una opción terapéutica, una cosa que nos diferencia en éste Título de Experto son las prácticas sobre pacientes, donde los participantes van a poder poner en práctica sobre pacientes los conocimientos adquiridos.

# PRF workshop and live patient implant surgery

**December 4-6, 2026**

**Vancouver, Canada**

The first day of this 3-day program focuses on the science and protocols of utilizing PRF and PRP in different clinical applications. Venipuncture is taught by a highly-experience phlebotomy instructor. The remaining two days will be spent treating patients under the supervision of an experience DDI faculty member. Participants will apply their previous didactic and hands-on training, such as atraumatic extractions, implant placement, bone grafting.

# Tailor-made training from the best

We continue to provide you with direct access to some of the most globally renowned clinicians, dental technicians and researchers. These experts are willing to share their experience with you and your teams. The arrangement could be a custom-made program focusing on specific topics in a lecture format, or watching the clinicians treat their own patients. Each of the experts in this section has a broad range of experience and can talk about the topics mentioned in their text. These topics should be seen as examples.

## Prof. Alessandro Pozzi

Prof. Alessandro Pozzi, DDS, PhD has been practicing dentistry since 1997, specializing in oral surgery, orthodontics, and TMJ dysfunctions. He holds dual licensure with the Italian General Dental Council of Rome and the UK General Dental Council of London.

Prof. Pozzi is a clinical researcher and Professor at the University of Rome Tor Vergata and serves as adjunct Associate Professor at the Goldstein Center for Esthetics and Implant Dentistry, Augusta University (USA). He is also an Adjunct Clinical Professor in the Department of Periodontics and Oral Medicine at the University of Michigan School of Dentistry (USA), and a lecturer at Harvard School of Dental Medicine (USA), Department of Restorative and Biomaterials Sciences.

### Focus topics

- Global expertise in digital implant dentistry
- Navigated surgery and photogrammetry
- Robotic surgery
- Surgical and prosthetic full-arch digital treatments
- FP1 and All-on-4<sup>®</sup> treatment concept protocols
- Digitally-driven protocols

### Location

Rome , Italy

### Language:

English, Italian

## Prof. Enrico Agliardi

Prof. Enrico L. Agliardi received his Doctor of Medicine and Surgery specialized in maxillofacial surgery and orthognatodontics from the Università degli Studi in Milan.

He is Associate Professor of odontostomatologic diseases, Chair of maxillofacial and special rehabilitation surgery at the Vita-Salute University in Milan, Course of Dentistry, and Director of the department of dentistry at Resnati San Raffaele Dental Clinic directed by Prof. Enrico Gherlone, Milan, Italy. He also has his own private practice based in Bollate, Milan. He is author of the training program 'Tilted Implants' with various online and onsite courses each year.

### Focus topics

- The All-on-4<sup>®</sup> treatment concept
- Zygoma rehabilitation
- Tilted implant approach
- Advanced prosthetic rehabilitation

### Location

Milan, Italy

### Language:

English, Italian

### More information

[education@nobelbiocare.com](mailto:education@nobelbiocare.com)

## Dr. Giorgio Tabanella

Dr. Giorgio Tabanella is a diplomate of the American Board of Periodontology and active member of the Italian Academy of Esthetic Dentistry. He is author of the book "Retreatment of Failures in Dental Medicine" and coauthor of the book "Building Better Bone". He graduated from the University of Southern California, Los Angeles, USA where he obtained his certificate in periodontics as well as a master of science in craniofacial biology. His research focuses on tissue regeneration and augmentation with different bone and soft graft materials, peri-implant and dental bone loss and novel protocols for the repair of ailing dental implants.

### Focus topics

- GBR and GTR
- Buccal pedicle flap technique
- Complication management
- Peri-implant bone remodeling
- Innovative protocols for ailing implants

### Location

Rome , Italy

### Language:

English, Italian

### More information

[education@nobelbiocare.com](mailto:education@nobelbiocare.com)

## Dr. Renaud Noharet

Dr. Renaud Noharet graduated from the faculty of dentistry at the University of Lyon. He received his post-graduate training in dentistry and implantology in Marseille, where he obtained the rank of Associate Professor and hospital practitioner in 2010. He received his Ph.D. from the University of Lyon and holds additional degrees and certifications in the subject of implantology and prosthesis.

He maintains a practice in Lyon focused on implantology and the overall rehabilitation of patients.

Dr. Noharet is the author of numerous publications and book contributions. He lectures at conferences both nationally and internationally and is also the founder of DCO France.

### Focus topics

- Digital dentistry
- Esthetic dentistry
- Navigated surgery and photogrammetry
- Ceramic courses
- Dental photography
- All-on-4® digital workflow
